PROFESSIONAL SUMMARY

Technical Product Owner with a strong foundation in Software Quality Assurance and SDET, experienced in delivering digital products across fintech and edtech. Skilled at translating business, customer, operational, and regulatory needs into clear product requirements while working closely with Engineering, QA, UI/UX, Operations, Commercial, and Marketing. Hands-on understanding of APIs, databases, integrations, production troubleshooting, UAT, and end-to-end software delivery enables effective collaboration between business and technical teams.

PROFESSIONAL EXPERIENCE

Product Owner

Komunal Indonesia | Dec 2023 – Present

- Own product initiatives for DepositoBPR across mobile, web, admin portals, and backend services from discovery and requirements through UAT, release, and post-production monitoring.
- Translate business, customer, operational, and regulatory needs into PRDs, user stories, acceptance criteria, and prioritized product backlogs.
- Collaborate cross-functionally with Engineering, QA, UI/UX, Operations, Commercial, Marketing, Finance, and external technology partners.
- Drive initiatives across digital deposits, payments and disbursement, promotions, corporate/business depositors, KYC, BPR fee management, analytics, and internal operational systems.
- Support third-party integrations and complex financial workflows involving identity verification, payment providers, callbacks, schedulers, and banking operations.
- Investigate production issues with technical teams using API flows, database analysis, logs, caching behavior, schedulers, and business rules to identify root causes and define fixes.
- Support security, compliance, and regulatory initiatives including KYC, APU-PPT requirements, and penetration-testing remediation.

Junior Software Development Engineer in Test (SDET)

Kuncie | Mar 2022 – Dec 2023

- Performed functional, API, integration, regression, and end-to-end testing for digital products.
- Created and maintained automated and manual test scenarios to improve release confidence and product reliability.
- Translated product requirements into comprehensive test cases and collaborated with Product, Engineering, and Design throughout the SDLC.
- Investigated defects, documented findings, supported root-cause analysis, and validated fixes before release.

Mentor

Jago QA Institute | Jul 2022 – Feb 2023

- Mentored learners in software QA fundamentals, test scenarios, test cases, bug reporting, API testing, and practical industry workflows.

Software QA Tester

PT Mitra Transaksi Indonesia | Sep 2021 – Mar 2022

- Executed functional, regression, integration, and API testing; documented defects and coordinated resolution with product and engineering teams.
- Validated application functionality and critical flows before production releases.

Administrator Database PRM

Kalbe Nutritionals – PT Sanghiang Perkasa | Apr 2021 – Sep 2021

- Maintained operational database records, performed data validation, and supported reporting and data consistency requirements.

CORE COMPETENCIES

Product: Product Ownership • Product Roadmap • Backlog Prioritization • PRD • User Stories • Acceptance Criteria • Requirement Analysis • Stakeholder Management • UAT • Agile/Scrum

Technical & QA: REST API • SQL • Database Analysis • System Integration • Functional Testing • Regression Testing • API Testing • E2E Testing • Test Automation • Root Cause Analysis • Git/GitHub

Tools & Domain: Postman • ClickUp • Firebase • GA4 • GTM • Datadog • Figma • Fintech • Banking • Digital Deposits • Payments • KYC • EdTech

EDUCATION

Bachelor of Information Systems (S1 Sistem Informasi)

Universitas AMIKOM Yogyakarta
